POL706

Phone & Tablet Display
Ultra High Security

POL706--Mechanical security solution for phones and tablets which can not only secure the display merchandise but also allows for full interaction and mobility. It is easy to install and operate. Duarable and stable, it can also work with LHT new KEY system to achieve instore zone management.

POL706

Benefits and Features

1. All-in-metal design offers the highest level of security, prevents cut & run theft.

2. Grip from 4 corners allows for maximum accessibility for full consumer interaction with screen and buttons while in lockdown mode

3. Quick-release of merchandise in seconds allows for a mobile use or a full product experience

4. Portrait and landscape 180 degree rotation while in lockdown mode for more fun experience

POL706

Benefits and Features

No false alarm or adhesive hassle, engineered for high and long store ROI

1. NO adhesives NO sensors------NO false alarm hassle

2. OEM power cable pass through design------NO high maintenance costs

3. Adjustable and exchangeable gripper sets for one size fits all feature------Use the same equipment over again when the displayed merchandise changes from old models to the latest, from phone to tablet, and when store layout and fixture retrofits

4. Can be mounted onto any surface, either at table top or

vertical wall or inclined surfaces------Save cost, Save environment!

SK100W
